

CONFIDENCE & PEACE OF MIND

"AgLogic 15GG is the GOLD STANDARD of performance which all other at-plant technologies are compared."

AgLogic 15GG aldicarb provides the peace of mind that growers have come to depend on. Cotton growers can be confident that they've given their cotton crop a strong foundation by protecting it from early season insects, mites and nematodes resulting in higher yields and superior lint quality.

AgLogicTM 15GG

- ◆ Widest spectrum of early season pest management on the market.
- ◆ Labeled for at-plant and side-dress applications
- ◆ Promotes Early Season Vigor
- ◆ Promotes root and canopy growth
- ◆ Key component of an IPM Program
- ◆ Promotes earliness
- ◆ Provides higher yields and profits

AgLogic™ 15GG

Early Season Insects and Mites

- ◆ *Rapid systemic activity*
- ◆ *Up to six weeks of control with a single at-planting application*
- ◆ *Reduces need for foliar over-sprays*
- ◆ *Minimizes potential for secondary flare-ups*
- ◆ *Key to an insect resistance management program*

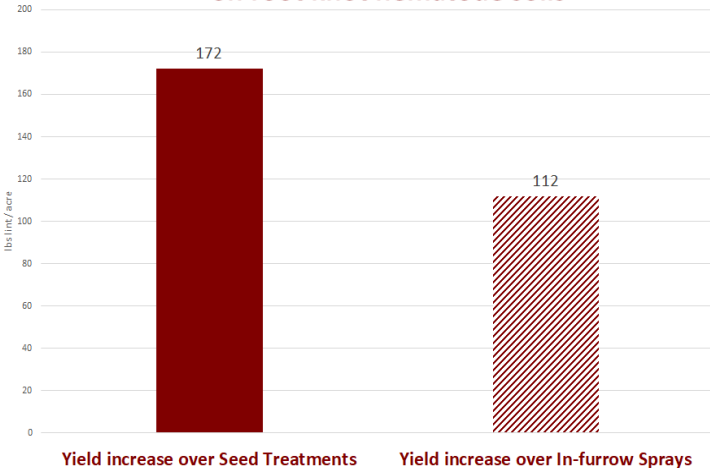

NEMATODES

- ◆ *Helps protect against early season damage from root-knot, reniform, lesion, Columbia lance and sting nematodes*
- ◆ *Minimizes secondary bacterial diseases associated with nematode infestations*

Get to the root of the problem!

In a subset summary from the field trials above on southern root knot nematode infested soils AgLogic 15GG at 5 lbs / acre out-yielded neonic seed treatments by 172 lbs / acre and out-yielded in-furrow sprays by 112 lbs / acre.

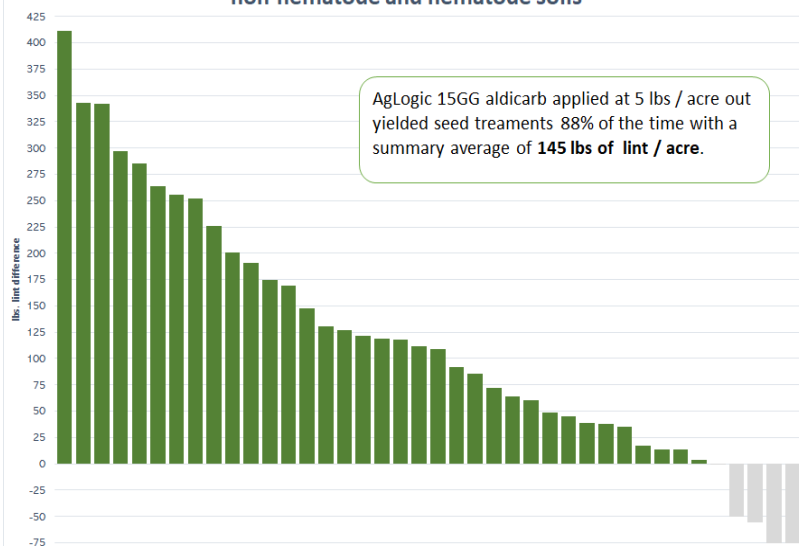

Yield vs Seed Treatments and In-furrow sprays on root knot nematode soils

3 year University Extension Trials

In a three year summary of 42 university extension field studies conducted across the cotton belt AgLogic 15GG out yielded neonicotinoid seed treatments 88% of the time with a summary average of 145 lbs of lint / acre in non-nematode and nematode soils

Lint yield increase over neonicotinoid seed treatments on non-nematode and nematode soils

Crop Management Benefits

- ◆ Stimulates early plant vigor resulting in optimum nutrient uptake and crop uniformity
- ◆ Increased canopy development that can help with weed management
- ◆ Crop earliness providing growers a timely and efficient harvest preserving lint quality

AgLogic™
Proven Maximum Performance

RESTRICTED USE PESTICIDE

DUE TO ACUTE ORAL, DERMAL and INHALATION TOXICITY and TO GROUND WATER CONTAMINATION

Always read and follow product label instructions.
